

OpenPortal[®] Directory

Success Story Partner

Neos SDI is a software and IT services company, specialized in integrating Microsoft technology based solutions. This company is a Microsoft Gold certified Partner.

Why Neos chose OpenPortal Directory?

As an IT solutions integrator, Neos SDI aims to “propose packaged solutions, fully integrable to accelerate projects and reduce costs” according to Olivier Magnin, Neos Sales Manager.

Big businesses regularly need solutions providing a better view of the hierarchical organization and transfer of user related information. The most important need is information sharing and transferring.

“The OpenPortal Directory solution is the information sharing and exchanging point within the company”

OpenPortal Directory has been lately deployed in the Bolloré Group, an important French business. This group was looking for a better overview of its organizational structure, as well as a shared access to corporate information for all its employees.

Benefits for Neos clients

“The OpenPortal Directory solution perfectly fits our clients’ needs. Indeed, it facilitates human flows organization, and brings a real added value regarding to information gathering, to create a point of reference for the company, while integrating seamlessly with Microsoft solutions.”

« Besides, OpenPortal Directory manages provisioning, which is another recurrent issue in big businesses that have to be able to integrate quickly new comers and to be reactive in case of organizational changes. In addition, it makes information rapidly available and enables reliable flows structuring, as well as HR processes acceleration.”

« Finally, we were seduced by OpenPortal Directory quick implementation, its out of the box functioning and its user friendly interface.”
